Field of service: Environmental audit
National Remediation Program

According to the assignment of the Ministry of National Cultural Heritage our company prepared the environmental audit of Hungarian castles, mansions and national monuments. In the scope of the audit every environmental elements have been examined. Beyond the presentation of the problematic fields, the analysis gives remediation suggestions and cost estimation.

By the processing of the ASZF data sheets, the classification of the hazardous polluted areas is executed, in the scope of the National Remediation Program. According to the classification there are real estates where the completion of the **B1** data sheet is needed. By the evaluation of the data sheets remediation programs have been prepared. The remediation programs support the environmental program of the real estates maintained by the Ministry of National Cultural Heritage.

Connected projects:

- *The definition of the remediation tasks, the priorities of the execution, scheduling and cost estimation of the institutions and real estates supervised and maintained by the Ministry of National Cultural Heritage, 2004.*
- *In the frame of the National Environmental Remediation Program, Ministry of National Cultural Heritage Subprogram, I. phase environmental audit has been prepared in case of 41 real estates, 2003.*
