Field of activity: Socio-economic impact assessment

The South-Trans-Danubian Environmental Protection and Water Management Directorate charged to carry out an environmental and socio impact assessment in the framework of “Reduction of Nutrient Discharges” project. The goal of the project was to investigate the environmental and socio-economic impacts of eleven recommended water management interventions in “Gemenc-Béda-Karapanca” Besides of this, an forum was held to present the results of the feasibility study and the impacts of the interventions to the stakeholders in the area.
