NEFAG Inc is managing 31 hectares of state forests at the southern part of Pest County and the whole area of Jász-Nagykun-Szolnok County. The company consists of three regional forestry: Szolnok Forestry, Pusztavacs Forestry and Monor Forestry.

On the area of Pusztavacs Forestry there are 1 piece of 30 m³ and 2 of 15 m³ subsurface oil tanks being out of order since 1991.

In 2005 NEFAG Inc decided to remove these tanks and assigned VTK Innosystem Ltd based on a public procurement procedure.

Our task was to obtain the necessary demolishing permits, including the preparation of the demolishing plans, carrying out and environmental assessment, and compiling a closing documentation. The demolition works, including earthworks, demolition and site restoration, were carried out by Geoprotect Ltd as subcontractor.
