Action Plan

The Magyar Közút Kht. provides the management of the national main road network by its 5 regional offices and 77 operative offices. In 2007 the Magyar Közút Kht. assigned VTK Innosystem Kft to survey the condition of the oil tanks located on its sites and prepare an action plan in order to improve their operational safety and reliability.

The project included the following sub-tasks::

1. A survey of the oil tanks on the sites based on site inspections and archive data,
2. Preparation an inventory on the tanks including their technical specifications, operational methods and environmental status.,
3. Preparation an investment plan.

Furthermore the experts of VTK Innosystem Kft. reviewed the concerned sites and proposed soil and groundwater sampling where it was appropriate.
