 ✉: Budapest, 1134 Pattantyús 7.
 ☎ +36(1)215-8857
 📧 : titkarsag@vtkinnosystem.com

Field of service: Environmental audit
 Privatisation
 IPPC
 BAT

VTK Innosystem was charged with the audits of industrial companies by National Privatisation Company and other industrial partners since 1994. The audit presents the environmental impacts of the activities, the legal compliance and the emerging environmental damages. Phase I (Desktop) audit gives a clear picture of the potential environmental damages according to the available information, while in case of Phase II (Full scale) audit sampling and other measurements are providing precise information about the extension and degree of the explored environmental damages.

If requested the environmental audit was concluding an IPPC documentation where risk assessment and BAT analysis completed the picture of the environmental performance of the assessed facility.
