<b>Keywords:</b>	International projects PHARE, ISPA, SENTER, US A.I.D. World Bank, EBRD, EXIM BANK INTERREG, LIFE, JICA

Since its establishment VTK Innosystem have participated in the preparation and implementation of several internationally funded projects, often in the form of international cooperation. Depending on the project we were acting as international or local project manager and/or provided professional expertise on environmental protection and water management. In the course of these jobs we obtained a wide range of experiences on the rules of administration of international projects and the coordination of the work of the diversely localised expert teams. Due to these cooperation we established a large pool of contacts from universities and research institutions.
